Strategy of Wrocław City:

Knowledge Based Economy - Regionally

- Creation of an open innovation environment
- Strengthen the spirit of collaboration and openness
- Integration of scientific community, “critical mass” for large scale projects in collaboration with industry, regional government, European partners
- High quality - interdisciplinarity - knowledge management - commercialisation

Campus Pracze - key project

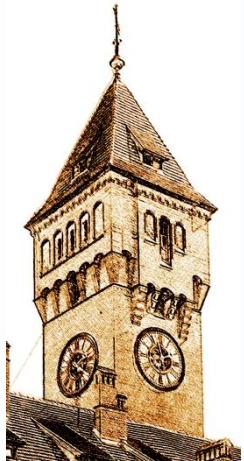

Wrocław in the European Research Area

Campus Pracze:

- “Meeting place” for science and business, different S&T disciplines, different cultures
- Heart of innovative Wrocław and Region; integration of scientific institutions in Region
- International and open for European/World partners
- “Magic place” for ambitious and creative people looking for good place to live and to work
- A draw for excellent Polish scientists and entrepreneurs coming back from abroad

Strong partner in European Research Infrastructure Network

Goals of 2nd ERIFID Conference

- **How to fill up the gap between new and old UE countries in R&D faster**
- **How to manage large scaled research infrastructures**
- **New financial tools for research and innovation development**
- **Knowledge and technology transfer between science and industry**
- **How to secure and manage Intellectual Property more efficiently**

Sessions

Plenary:

- **Management of Research Infrastructures**
- **Financing Research & Development to serve the economy**
- **Tools which make the European Research Area work**
- **Polish strategic research areas**

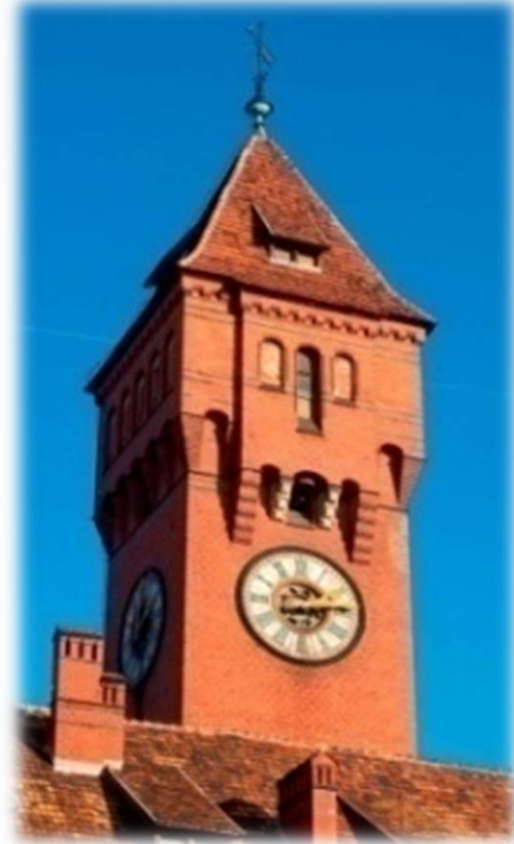

Paralel:

- **Technology transfer**
- **Partnership Policy**
- **Getting more out of science in business**
